EXPERIENCE

Software Developer | VoyageX.ai, Gurugram *Apr 2026 – Present*

- Built and operated 20+ Cloud Functions on VoyageX Server, powering core backend logic including job generation, data sync, and notification triggers for the VoyageX vessel management app.
- Maintained and enhanced the legacy Darya system, ensuring reliable and uninterrupted operations across 50+ vessels.
- Contributing to VoyageX deployment integration at New Mangalore Port, supporting real-world maritime operations.

Software Developer Intern | VoyageX.ai, Gurugram *Dec 2025 – Apr 2026*

- Developed and maintained core modules of a production Vessel Management System (VMS) app using Flutter, Firebase/Firestore, and Riverpod for state management.
- Diagnosed and fixed a Planned Maintenance System (PMS) bug where bulk-deleting job documents bypassed the completion trigger, leaving the jobs collection empty; resolved by invoking the job-generation logic directly inside the Cloud Function.
- Collaborated with a cross-functional product team using Git-based workflows and structured code reviews to ship features across sprints.

Data Engineering Intern | Infosys Springboard Virtual Internship 6.0, Remote *Dec 2025 – Feb 2026*

- Built and deployed an automated ETL orchestration framework using Python and Apache Airflow, processing 5,000+ records across large-scale data pipelines.
- Designed multi-format ingestion pipelines (CSV, Excel, JSON, PDF, DOCX) backed by a 5-dimension data quality scoring engine.
- Implemented Airflow DAG scheduling with retry logic and built a Streamlit monitoring dashboard for real-time pipeline visibility, cutting manual oversight by ~40%.

PROJECTS

Enterprise ETL Orchestration Platform *Dec 2025 – Apr 2026*

Python · FastAPI · Apache Airflow · Streamlit · PostgreSQL · Docker

- Architected a production-grade ETL platform processing multi-format datasets with a 5-dimension quality scoring engine, handling 10,000+ records per run.
- Containerized 8 microservices (FastAPI, Airflow, Celery, Redis, PostgreSQL) with a real-time Streamlit dashboard for one-command deployment and full pipeline visibility.

AI-Powered Smart Chatbot with Notification System *Dec 2024 – Jan 2025*

Python · OpenAI API · Async · WebSockets

- Engineered an asynchronous chatbot using the OpenAI API with real-time WebSocket-based notifications, supporting concurrent user interactions.
- Reduced response latency by ~35% through asynchronous processing and optimized OpenAI API interactions.

Leave Management System *Mar 2024 – Oct 2024*

PHP · MySQL · HTML/CSS · RBAC

- Developed a role-based leave management platform for 100+ employee records with automated approval pipelines and reporting modules.
- Implemented automated approval workflows and role-based access control (RBAC), improving process reliability and secure access to employee leave data.

TECHNICAL SKILLS

Languages: Python, Dart, PHP, SQL, HTML/CSS, Bash
Mobile & Frameworks: Flutter, Riverpod, FastAPI, REST APIs, SQLAlchemy
Backend & Cloud: Firebase, Firestore, Cloud Functions, PostgreSQL, Redis
Data & Orchestration: Apache Airflow, Pandas
DevOps & Tools: Docker, Docker Compose, Git, GitHub
Dashboards & Viz: Streamlit, Plotly, pdfplumber, python-docx

CERTIFICATIONS & COURSES

- Stanford University (Coursera) — Machine Learning Specialization, June 2025
- Google–Kaggle — Agentic AI (5-Day Intensive), 2025
- Infosys Springboard — OOP with Python, NoSQL Databases, Programming Fundamentals, Oct 2025
- Forage Virtual Simulations — Accenture Nordics Software Engineering; Tata Group Data Visualisation
- University of Michigan (Coursera) — Python for Everybody · Python Data Structures

EDUCATION

B.Tech, Computer Engineering | Ganpat University – U.V. Patel College of Engineering, Gujarat Aug *2022* – Mar *2026*

CGPA: 7.45

- Main Coordinator, 'Infocrafts' Project Presentation — National Level Convergence Technical Fest (2025); managed 50+ participants and end-to-end event execution.
